

VIRTUAL CONFERENCE

ISSUES TECHNOLOGIES & SOLUTIONS FOR OCEAN CLEANUP

SEPTEMBER 18, 2020 (FRIDAY)

10:30 AM TO 5:00 PM

INDIAN TIME (+5:30 GMT)

AGENDA

ISSUES TECHNOLOGIES AND SOLUTIONS FOR OCEAN CLEANUP

Over 100 million marine lives die due to the ocean plastic waste and over 5.25 trillion pieces of plastics waste are estimated to be in our oceans which is a new disaster challenging to us.

There are many issues, policies and technologies working for the ocean cleanup and marine solutions. We have made more plastics in the last 10 years than the last century, but littering and unorganised management has led us into the worst situation so far as the ocean situation is concerned.

This virtual conference will cover the entire ecosystem, issues and solutions of ocean plastics waste in the world.
